

A team of safety industry professionals combining real world emergency response experience with design, manufacturing, & supply chain excellence.

Advances in technology and manufacturing are improving our world at an unprecedented pace, but those advances are sometimes slow to reach well-established industries like safety. We've set out to change that. Our vision is to use smart innovation and efficient manufacturing to create safety products that break new ground; marked by enhanced functionality, affordability and sleek aesthetics.

Why Choose Cubix Safety?

THOUGHTFUL ENGINEERING

By meticulously rethinking, designing, and developing each product from the ground up, we strive to create subtle improvements across all aspects of our product line. When combined, these improvements lead to a superior level of innovation and value.

COMPETITIVE PRICING

By optimizing all aspects of the design, manufacturing, and supply-chain process we are able to pass along economical pricing to our distributors. Savings gained through market share and economy of scale are passed onto you with no compromise in quality.

QUALITY SUPPORT

Best customer service, return, and warranty policies in the business, bar none. Every customer is deeply important as a matter of company culture, and we strive for same or next day shipping across the United States and beyond, with blind dropship options available.

Our premium, high quality products are second to none in the AED and safety industries, and include a full line of both indoor and outdoor AED and safety cabinets, AED accessories of all types, and bleeding control kits including DoD licensed STOP THE BLEED® kits. Please contact us today to talk about how we can partner with you on any of our existing products, or custom-designed / custom-branded products.

Cubix Safety applies customer-centric product design practices.
